To Use This Chart
• Use the XL icons to align the 8.5” x 11” printouts placing page 2 on top of this page and tape together.

To Find Your Length
1. Align your heel where indicated on the chart. The line that touches your longest toe indicates your shoe size.
2. If your measurement is between two sizes, always move up to the larger size.
3. Write in your size at the upper left corner of this chart.

Measuring Tip:
• Be sure to measure both feet to ensure the best size to order. Always order the larger size of the two feet.
To Use This Chart
• Use the XL icons to align 8.5” x 11” printouts and tape together.

To Find Your Length

SIZE CHART

<table>
<thead>
<tr>
<th>Size/Length</th>
<th>Width</th>
</tr>
</thead>
</table>

Measuring Tip:
• Be sure to measure both feet to ensure the best size to order. Always order the larger size of the two feet.
To Find Your Width

1. Align the widest part of your foot against the width line of the width ruler.
2. Once you determine your width measurement, check the size chart on page 2 and locate your shoe size. Follow the line across until you reach your width measurement.
3. Write in the letter of the column that corresponds with your width measurement (B, D, EE, or EEEE) at the upper left corner of page 1.

### Measuring Tip
- Be sure to measure both feet to ensure the best size to order. Always order the larger size of the two feet.
